PERSONAL PROJECTS

CV Website (12/2020 - 12/2020)

- Built a static CV Website using HTML, CSS, Bootstrap & JQuery

Platform for Research & Development (05/2020 - 07/2020)

- Built a web platform where students interested in research can collaborate with mentors and fellow researchers from around the globe. It has features like course, mentor & domain recommendation using the data collected during signup.

Hostel Management System (10/2019 - 11/2019)

- Built a GUI based application in Javafx Swing with a SQL server in the backend for the database. It has a login page for the users and they can login to check for existing student / hostel record or enter new details.
